

Gender Pay Gap

Flood Re has actively chosen to calculate our gender pay gap and share this internally and externally in the spirit of transparency. This supports our work on diversity and inclusion and our commitment to the Women in Finance Charter.

The gender pay gap calculations show the difference in the average pay between all men and all women regardless of their role or level. This is different from the requirement for equal pay. Equal pay deals with the pay difference between men and women who carry out the same jobs, similar jobs, or work of equal value. It is unlawful to pay people unequally because of their gender.

Our approach

Flood Re has used the snapshot date of 5 April 2022 to calculate our average hourly pay rates and looked at bonus payments over the preceding 12 months. We have done this to make the calculations as relevant as possible, resulting in a real time view of our gender pay gap. At this point in time Flood Re had 52 employees on the payroll, compared to 40 in April 2021.

Our results

Gender split of Flood Re at Snapshot Date

Gender pay gap

Mean pay gap in hourly pay as % of men's pay	32.74% (previously 50.97%)
Median pay gap in hourly pay as % of men's pay	24.84% (previously 55.07%)

Gender Representation at each pay quartile at Snapshot Date

Bonus gap

Mean bonus pay gap as % of men's pay	64.34% (previously 72.61%)
Median bonus pay gap as % of men's pay	58.10% (previously 48.92%)

Conclusion

The method for calculating gender pay gap has been formulated for much bigger firms (250+ employees) as within a very small population, a small number of outliers have the potential to make a big difference to the overall results.

Compared to last year we have seen a decrease in our gender pay gap. Since this calculation was last conducted, Flood Re's headcount has increased and turnover has resulted in a number of role incumbents changing. In summary, we have seen an increase in males holding mid to junior level roles within the organisation compared to last year. In addition, the make-up of our Executive Committee

has also changed from only 12% female representation in April 2021 to 37.5% in April 2022. Whilst this shift is pleasing, we continue to recognise there is still a gender imbalance in our highest paid roles. We therefore continue to be committed to the Women in Finance Charter and have set a new and stretching target to achieve gender parity on our Executive Committee by 2025. You can find our [Women in Finance Charter pledge](#) on our website.
